PROFESSIONAL SUMMARY

Computer Science and Design graduate with hands-on experience building full-stack web applications, backend systems, and AI-powered solutions. Skilled in Node.js, Express.js, React.js, Next.js, Python, Firebase, and Supabase with a strong foundation in REST APIs, databases, and scalable software development. Completed an industry-oriented internship in Intelligent Robotics & AI Integration.

EDUCATION

Dayananda Sagar Academy of Technology and Management (VTU) Nov 2022 – May 2026
Bachelor of Engineering in Computer Science and Design (CGPA: 8.03 / 10.0) Bangalore, Karnataka

INTERNSHIP

iSpark Learning Solutions Pvt. Ltd. Feb 2026 – May 2026
Intelligent Robotics & AI Integration Intern

- Completed an industry-oriented internship focused on Intelligent Robotics, Artificial Intelligence, and autonomous systems.
- Gained hands-on exposure to ROS2, SLAM, sensor fusion, Human-Robot Interaction, and AI-based robotics through technical assignments and simulations.
- Participated in technical assignments, simulations, and a capstone project, strengthening problem-solving and system design skills.

PROJECTS

Mehendi State Academy — Online Learning Platform Jun 2026 – Present
Next.js, React.js, Tailwind CSS, Supabase, Node.js GitHub

- Designing and developing a full-stack website for a professional Mehendi training academy with course management, student enrollment, and inquiry features.
- Built responsive pages, authentication, and backend services using Next.js and Supabase.
- Collaborating directly with the client to translate business requirements into production-ready features.

Vyapari Copilot — AI Business Management Platform Aug 2025 – Nov 2025
Node.js, Express.js, React.js, Firebase Firestore, Telegram Bot API Frontend | Backend

- Designed and developed a business automation platform enabling small businesses to manage sales, expenses, inventory, and financial reporting through a Telegram bot.
- Built REST APIs and integrated Firebase Firestore for transaction and inventory management.
- Implemented automated reporting and low-stock alerts to streamline business operations.

AI-Based Remaining Useful Life Prediction System Apr 2025 – Dec 2025
Python, TensorFlow, CNN-LSTM, Machine Learning GitHub

- Developed a CNN-LSTM model for Remaining Useful Life prediction using multivariate sensor data.
- Built a preprocessing pipeline including normalization, feature extraction, and model evaluation.
- Evaluated the model on the NASA C-MAPSS dataset for predictive maintenance applications.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, C
Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS
Backend: Node.js, Express.js, REST APIs, JWT Authentication, Webhooks
Databases: Firebase Firestore, Supabase, MongoDB, MySQL
Tools & Platforms: Git, GitHub, Docker, Linux, Postman, VS Code
Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, System Design Basics
AI / Machine Learning: TensorFlow, CNN-LSTM, Time-Series Analysis, Predictive Modeling

ACHIEVEMENTS & CERTIFICATIONS

- Secured a campus placement offer from Infosys for the Systems Engineer role.
- Completed the Intelligent Robotics & AI Integration Internship at iSpark Learning Solutions Pvt. Ltd.
- Built software solutions involving REST APIs, cloud databases, authentication, and business automation using modern web technologies.
